TECHNICAL DATA SHEET

BLANKET

EASY PRINT PLUS UV

Blanket for sheet printing in processes where one press uses hybrid systems.

Characteristics:

- very high stability, rubber does not deform and does not change its dimensions when used with non-aggressive UV inks and removers
- new compression surface and carcass construction improve durability and resistance to removers, it simultaneously decreases the risk of delamination,
- special printing surface improves ink transfer and dot sharpness,
- recommended for use with day fluorescent inks, metallic inks and conventional mineral oil-based inks and UV inks.

TECHNICAL DATA

Printing surface	Colour: Indygo Surface: polished Construction: compressive
Roughness	0.6-0.9 μm
Micro hardness	68 \pm 3IRHD
Elongation	< 0,7% w 500N/5cm
Nominal thickness	1.70mm/1.90mm \pm 0.02mm
