TECHNICAL DATA SHEET

DM Regenerator, agent for cleaning water rollers of printing presses

Use:

Clean the rollers with a sponge or cloth soaked with DM Regenerator, then clean with water.

Description:

It a mixture of solvents and surface active agents, which when properly used will remove ink from moisturizing chrome, steel and rubber rollers.

Regular application will increase their hydrophilic properties, protects against hardening after use of alcohol and solvents.

- Prescribed for moisturizing rollers
- Increase hydrophilic properties of moisturizing rollers
- Water miscible
- Effectively removes inks
- Regenerates rubber
